Product	Item Description	Potential Benefits	Research Dosing
AOD-9604 Fat Metabolism & Weight Loss	AOD 9604, a synthetic peptide mimicking human growth hormone (HGH), is designed to enhance fat metabolism and support weight loss. AOD 9604 is generally well-tolerated, with mild side effects like headaches, fatigue, or nausea.	Supports healthy weight management Encourages a balanced metabolism Assists in maintaining body composition Promotes muscle and tissue support Aids in bone and cartilage health Supports healthy blood sugar regulation Encourages a balanced inflammatory response	0.15 mL subcutaneously in the morning, followed by minimum two hours fasting or as directed by your healthcare provider.
BPC-157 The "Healing" Peptide	BPC-157, a synthetic peptide derived from a protective protein found in the stomach, is designed to accelerate healing and reduce inflammation. BPC-157 is generally well-tolerated, with mild side effects like nausea, dizziness, or redness at the injection site. Consult your doctor before beginning therapy.	Supports the body's natural healing processes Promotes a balanced inflammatory response Assists in joint and tendon health Encourages recovery and repair Aids in maintaining gut health Provides antioxidant support May help with discomfort management	0.15mL subcutaneously Monday-Friday. Rest on the weekends or as directed by your healthcare provider.
BPC / TB-500 Tissue repair, Joints & Tendons, Inflammation	BPC-157 and TB-500 are powerful peptides renowned for their synergistic effects in supporting recovery and repair. Together, they promote flexibility, resilience, and balance in the body, making them a popular choice for those focused on optimizing joint, muscle, and connective tissue health.	Supports the body's natural healing processes Encourages tissue repair and regeneration Assists in joint and tendon health Promotes flexibility and mobility Aids in maintaining muscle and connective tissue health Supports a balanced inflammatory response Enhances recovery and overall wellness	0.15mL subcutaneously Monday - Friday. Rest on the weekends or as directed by your healthcare provider.
CJC - 1295 Recovery, Muscle Growth, Healthy Aging	CJC-1295 is a peptide designed to stimulate the natural production of growth hormone, supporting overall vitality and well-being. It is commonly used for its potential to enhance physical performance, recovery, and anti-aging benefits.	Encourages natural growth hormone production Supports muscle growth and strength Promotes recovery and tissue repair Aids in maintaining skin elasticity and reducing signs of aging Supports improved sleep quality Encourages fat metabolism and body composition balance Enhances overall energy and vitality	0.15mL subcutaneously in the stomach Monday - Friday. Rest on the weekends or as directed by your healthcare provider.

	CJC / IPA Strength, Recovery, Vitality	CJC-1295 combined with Ipamorelin is a powerful peptide duo designed to naturally boost growth hormone production, supporting recovery, muscle growth, and overall vitality. This synergistic combination is ideal for optimizing physical performance and promoting healthy aging.	Encourages natural growth hormone production Supports muscle growth and strength Promotes recovery and tissue repair Aids in maintaining skin elasticity and reducing signs of aging Supports improved sleep quality Encourages fat metabolism and body composition balance Enhances overall energy and vitality	0.15mL subcutaneously in the stomach Monday - Friday. Rest on the weekends or as directed by your healthcare provider.
	DSIP Sleep, Stress, Mental Restoration	DSIP is a unique peptide known for its role in promoting deep, restorative sleep and supporting the body's natural recovery processes. It is ideal for individuals seeking to enhance sleep quality and overall well-being.	Promotes deep and restorative sleep Supports the body's natural recovery processes Encourages relaxation and stress management May aid in balancing circadian rhythms Helps improve energy and focus during the day Supports overall physical and mental well-being	0.10mL subcutaneously Monday, Wednesday, and Friday or as directed by your healthcare provider.
	EPITALON Longevity & Cellular Health	Epitalon is a peptide renowned for its potential to promote longevity and cellular health. By supporting the regulation of telomeres, it encourages healthy aging and overall vitality, making it an excellent choice for optimizing longterm wellness.	Supports telomere maintenance for healthy aging Encourages cellular repair and regeneration Promotes deep, restorative sleep Enhances immune system function May improve energy levels and mental clarity Helps regulate circadian rhythms for better overall balance Supports overall vitality and well-being	0.10mL subcutaneously Monday, Wednesday, and Friday or as directed by your healthcare provider.
	GHK-CU Collagen Production, Skin, Anti-Aging	GHK-Cu is a copper peptide celebrated for its regenerative properties, particularly in skin, tissue repair, and overall vitality. It supports collagen production and wound healing, making it a popular choice for those seeking anti-aging and recovery benefits.	Promotes skin rejuvenation and reduces finelin es Supports wound healing and tissue repair Encourages collagen and elastin production for skin elasticity May improve hair growth and thickness Reduces inflammation and oxidative stress Enhances overall skin tone and appearance Supports cellular health and repair processes	0.10mL subcutaneously Monday, Wednesday, and Friday or as directed by your healthcare provider.
	IGF - LR3 Growth, Recovery, Vitality	IGF-1 is a peptide known for its role in supporting growth, recovery, and overall vitality. It promotes muscle development, tissue repair, and anti-aging benefits, making it ideal for those seeking to optimize physical performance	Promotes muscle development and physical performance Supports tissue repair and recovery from injury Encourages cellular growth and regeneration Aids in maintaining healthy body composition Enhances bone density and joint health Supports energy levels and vitality May contribute to overall anti-aging effects and longevity	0.10mL subcutaneously Monday, Wednesday, and Friday or as directed by your healthcare provider.
	IPAMORELIN Growth, Recovery, Strength	Ipamorelin is a peptide known for its ability to stimulate natural growth hormone production, supporting muscle growth, fat metabolism, and recovery. It is favored for its targeted action and minimal side effects, making it an excellent choice for optimizing physical performance and overall well-being.	Stimulates natural growth hormone release Supports muscle growth and development Promotes fat metabolism and healthy body composition Enhances recovery and tissue repair Encourages better sleep quality and energy levels May improve skin elasticity and reduce signs of aging Supports overall vitality and wellness	.15mL subcutaneously in the stomach Monday Friday. Rest on the weekends or as directed by your healthcare provider.
	KISSEPTIN	Kisspeptin is a peptide known for its role in regulating reproductive health and hormonal balance. It supports natural fertility, enhances libido, and promotes	Supports natural reproductive health and fertility May enhance libido and sexual wellness Promotes hormonal balance and regulation Encourages optimal function of the hypothalamic-	0.15mL subcutaneously 2 to 3 times per week or as directed by your healthcare provider.

Injectable Peptides

Fertility, Libido, Balance	overall hormonal harmony, making it a key player in optimizing reproductive well-being.	pituitary-gonadal axis May improve mood and emotional well-being Supports overall reproductive system health and vitality	
LL - 37 Immunity, Healing, Defense	LL-37 is an antimicrobial peptide known for its ability to support immune function, promote wound healing, and combat infections. It plays a critical role in maintaining the body's natural defenses and fostering tissue repair.	Supports the body's natural immune response May help combat bacterial, viral, and fungal infections Promotes wound healing and tissue repair Encourages balanced inflammation management May protect against harmful pathogens and microbes Supports overall skin and mucosal health Aids in maintaining optimal immune system function	.10mL subcutaneously once a week. Increase every 4 weeks as tolerated or as directed by your healthcare provider.
MOTS-C Fertility, Libido, Balance	MOTS-c is a mitochondrial-derived peptide known for its role in promoting metabolic health, enhancing energy production, and supporting cellular function. It helps the body adapt to metabolic stress and may contribute to overall vitality and longevity.	Enhances mitochondrial function and energy production Supports healthy metabolism and fat utilization Promotes insulin sensitivity and blood sugar regulation Encourages cellular resilience to metabolic stress May aid in maintaining healthy body composition Supports overall vitality and longevity Helps optimize physical and cognitive performance	0.15 ml subcutaneously early in the day to optimize energy or as directed by your healthcare provider.
MT-11 Repair, Energy, Vitality	MT-11 is a peptide recognized for its potential in promoting cellular repair, enhancing energy production, and supporting overall mitochondrial health. It plays a key role in optimizing cellular function and combating oxidative stress for improved vitality.	Supports mitochondrial health and energy production Promotes cellular repair and regeneration Enhances resilience to oxidative stress Encourages optimal cellular function and efficiency May improve physical endurance and recovery Supports healthy aging and longevity Aids in maintaining overall vitality and wellbeing	0.5mL subcutaneously twice weekly or as directed by your healthcare provider.
PT-141 Arousal, Intimacy, Wellness	PT-141 is a peptide known for its ability to enhance sexual wellness, stimulate arousal, and support hormonal balance. It is often used to promote intimacy and address sexual health concerns, making it a popular choice for improving overall well-being in this area.	May enhance sexual arousal and desire Supports improved intimacy and connection May promote hormonal balance and sexual health May address sexual dysfunction concerns Encourages overall confidence and well-being Works independently of traditional pathways, offering a unique mechanism of action May supports a healthy and fulfilling lifestyle	0.10mL 45 minutes before sexual activity no more than 3 times per week or as directed by your healthcare provider.
SELANK Connection, Trust, Well-Being	Selank is a peptide known for its role in supporting mental clarity, reducing stress, and promoting emotional balance. It is commonly used to enhance cognitive function and improve resilience to anxiety, making it a powerful tool for mental well-being.	May reduces stress and anxiety May enhance mental clarity and cognitive function May promote emotional balance and stability Encourages resilience to mental fatigue May improve focus and concentration Supports overall mood and well-being Aids in achieving a state of calm and relaxation	0.10mL subcutaneously Monday - Friday. Rest on the weekends or as directed by your healthcare provider.
SEMAX	Semax is a peptide known for its ability to enhance cognitive function, boost focus, and support neuroprotection. It is often used to improve mental clarity, memory, and resilience to stress, making it a	Enhances cognitive function and mental clarity Supports memory improvement and learning ability Promotes resilience to stress and mental fatigue Encourages neuroprotection and brain health May improve mood and emotional stability	0.10mL subcutaneously Monday - Friday. Rest on the weekends or as directed by your healthcare provider.

	Focus, Memory, Resilience	and resilience to stress, making it a valuable tool for brain health and performance.	may improve mood and emotional stability Boosts focus and concentration during demanding tasks Supports overall mental performance and wellbeing	healthcare provider.
	SELANK/SEMAX Connection, Trust, Well-Being	The combination of Selank and Semax offers a powerful synergy for enhancing cognitive performance, reducing stress, and promoting emotional balance. Together, they support mental clarity, resilience, and focus, making them ideal for optimizing brain health and overall well-being.	Enhances cognitive function and mental performance Promotes emotional balance and stress resilience Supports memory improvement and learning ability Encourages focus and sustained concentration Provides neuroprotection for long-term brain health May improve mood and reduce anxiety Aids in achieving mental clarity and overall wellbeing	0.10mL subcutaneously Monday - Friday. Rest on the weekends or as directed by your healthcare provider
	SEMAGLUTIDE Weight, Metabolism, Control	Semaglutide is a medication known for its ability to support weight management, improve metabolic health, and regulate blood sugar levels. It is often used as part of a comprehensive approach to achieving a healthier lifestyle and improved wellbeing.	Supports weight management and fat loss Improves metabolic health and insulin sensitivity Regulates blood sugar levels effectively Helps control appetite and reduce cravings Encourages a balanced and healthy body composition May enhance energy levels and overall vitality Supports long-term health and lifestyle changes	Start at .25mg increase as directed or as directed by your healthcare provider.
	SEMORELIN Growth, Recovery, Vitality	Sermorelin is a peptide known for stimulating natural growth hormone production, supporting recovery, and promoting healthy aging. It is often used to enhance vitality, improve physical performance, and maintain overall well-being.	Stimulates natural growth hormone production Supports tissue repair and recovery Promotes muscle growth and strength Encourages healthy metabolism and fat utilization Enhances energy levels and stamina Supports skin elasticity and reduces signs of aging Aids in improving sleep quality and overall wellness	.10mL subcutaneously Monday - Friday. Rest on the weekends or as directed by your healthcare provider.
	TB - 500 Healing, Recovery, Flexibility	TB-500 is a synthetic peptide known for its ability to promote healing, reduce inflammation, and enhance recovery. It is widely used to support tissue repair, improve flexibility, and maintain overall physical performance.	Supports tissue repair and regeneration Promotes faster recovery from injuries Reduces inflammation and supports joint health Encourages improved flexibility and mobility Aids in maintaining muscle and tendon health Enhances overall physical performance and resilience Supports long-term wellness and injury prevention	.15mL subcutaneously in the stomach Monday - Friday. Rest on the weekends or as directed by your healthcare provider.
	TESAMORELIN Fat, Metabolism, Vitality	Tesamorelin is a peptide primarily known for its ability to promote fat reduction, enhance metabolism, and support healthy aging. It is commonly used to target abdominal fat while improving energy and overall well-being.	Promotes reduction of abdominal fat Supports healthy metabolism and energy levels Stimulates natural growth hormone production Encourages improved body composition May enhance physical performance and recovery Supports long-term health and aging gracefully Aids in maintaining overall vitality and wellbeing	0.20mL subcutaneously in the stomach Monday - Friday. Rest on the weekends or as directed by your healthcare provider.
	THYMOSIN ALPA Immunity, Resilience, Recovery	Thymosin Alpha-1 is a peptide known for its ability to boost immune function, enhance resilience, and promote recovery. It is widely used to support the body's natural defenses and maintain overall wellbeing.	Enhances the body's natural immune response Promotes recovery from infections and illnesses Supports a balanced and healthy inflammatory response Encourages resilience to environmental stressors Aids in maintaining long-term immune system health Boosts energy and overall vitality Supports optimal physical and immune resilience	0.15mL subcutaneously in the stomach Monday thru Friday or as directed by your healthcare provider.
	TIRZAPETIDE	Tirzepatide is a novel medication known for its dual action in regulating blood sugar and promoting weight loss. It supports metabolic health, appetite control, and	Supports healthy blood sugar regulation Promotes significant weight loss and fat reduction Enhances metabolic health and insulin sensitivity Encourages appetite control and reduced cravings	Start at 2.5mg increase as directed or as directed by your healthcare provider.

	Growth, Recovery, Vitality	metabolic health, appetite control, and overall well-being, making it a powerful tool for comprehensive health management.	Encourages appetite control and reduced cravings Improves energy levels and vitality Aids in maintaining balanced body composition Supports long-term health and lifestyle changes	
Oral Peptides	BPC-157 Gut, Healing Recovery	BPC-157 oral is a peptide known for its potential to support gut health, reduce inflammation, and promote tissue repair. Taken orally, it is commonly used to address gastrointestinal concerns and enhance overall well-being.	Supports gastrointestinal health and function Promotes tissue repair and regeneration Reduces inflammation throughout the body Encourages recovery from gut-related issues Aids in maintaining a balanced digestive system Supports overall health and resilience Provides a convenient option for systemic healing benefits	1 capsule daily or as directed by your healthcare provider.
	DIHEXA Cognition, Memory, Clarity	DiHexa is a peptide known for its potential to enhance cognitive function, support neuroprotection, and promote memory improvement. It is often used to optimize brain health and boost mental clarity, making it a valuable tool for cognitive wellness.	Enhances cognitive performance and mental focus Promotes memory retention and learning capabilities Supports neuroprotection and brain health Encourages resilience to cognitive decline May improve problem-solving and decisionmaking skills Boosts overall mental clarity and sharpness Aids in maintaining long-term brain function and wellness	1 capsule daily or as directed by your healthcare provider.
	KPV Inflammation, Healing, Gut	KPV is a tripeptide known for its anti-inflammatory properties, its role in supporting gut health, and promoting skin healing. It is commonly used to address inflammation-related conditions and Suggested Use enhance overall physical well-being.	Reduces systemic and localized inflammation Supports gastrointestinal health and repair Promotes wound healing and skin regeneration Encourages a balanced immune response Aids in managing inflammatory skin conditions Supports recovery from inflammation-driven issues Enhances overall physical health and resilience	1 capsule daily or as directed by your healthcare provider.
	MK-677 Growth, Recovery, Vitality	MK-677, also known as Ibutamoren, is a growth hormone secretagogue that supports muscle growth, enhances recovery, and promotes healthy aging. It is widely used for its ability to boost growth hormone levels and improve overall vitality.	Increases natural growth hormone and IGF-1 levels Supports muscle growth and improved strength Promotes faster recovery and tissue repair Encourages healthy metabolism and fat utilization Enhances sleep quality and energy levels Aids in maintaining skin elasticity and reducing signs of aging Supports overall physical performance and wellbeing	1 capsule daily or as directed by your healthcare provider.
	TESOFENSINE Appetite, Metabolism, Weight	Tesofensine is a serotonin-noradrenalin-dopamine reuptake inhibitor (SNDRI) known for its potential to support weight management, suppress appetite, and enhance metabolic health. It is commonly used as part of a comprehensive approach to achieving a healthier body composition.	Supports effective weight management Reduces appetite and food cravings Enhances metabolic rate and energy expenditure Promotes fat loss and improved body composition Encourages sustained energy levels and focus May contribute to mood stabilization and overall well-being Aids in achieving long-term lifestyle and health goals	1 capsule daily in the morning or as directed by your healthcare provider.
	BPC-157	BPC-157 nasal spray is a peptide formulation known for supporting recovery, reducing inflammation, and promoting gut and brain health. Its nasal delivery makes it	Supports tissue repair and regeneration Reduces systemic and localized inflammation Promotes gut health and mucosal healing Enhances brain health and cognitive function	1 spray daily or as directed by your healthcare provider.

Nasal Peptides

Recovery, Inflammation, Healing	and brain health. Its nasal delivery makes it convenient for targeting systemic and localized benefits.	Enhances brain health and cognitive function Encourages faster recovery from injuries or stress Provides convenient and effective nasal delivery Supports overall physical and mental well-being	
DSIP Sleep, Recovery, Calm	DSIP nasal spray is a peptide formulation known for its ability to promote deep sleep, reduce stress, and enhance recovery. The nasal delivery provides a convenient way to improve rest and overall wellbeing.	Promotes deep and restorative sleep Supports the body's natural recovery processes Reduces stress and encourages relaxation Helps regulate circadian rhythms for better rest May improve energy levels and focus during the day Enhances resilience to mental and physical fatigue Provides convenient and effective nasal delivery for immediate benefits	1 spray daily or as directed by your healthcare provider.
GHK-CU Regeneration, Healing, Repair	GHK-Cu nasal spray is a peptide formulation known for its ability to support skin regeneration, promote healing, and enhance overall cellular repair. Its nasal delivery allows for convenient and systemic application of its benefits.	Supports skin regeneration and elasticity Promotes tissue repair and wound healing Enhances cellular health and repair processes Encourages anti-aging effects for skin and hair Reduces inflammation and oxidative stress Boosts overall resilience and vitality Provides convenient and effective nasal delivery for systemic benefits	1 spray daily or as directed by your healthcare provider.
IPAMORELIN Growth, Recovery, Vitality	Ipamorelin nasal spray is a peptide formulation known for stimulating natural growth hormone release, supporting muscle recovery, and promoting healthy aging. Its nasal delivery provides a convenient option for optimizing physical and metabolic health.	Stimulates natural growth hormone production Supports muscle growth and recovery Promotes healthy metabolism and fat utilization Encourages improved sleep quality and energy levels Aids in maintaining skin elasticity and reducing signs of aging Enhances physical performance and resilience Offers a convenient and effective nasal delivery system	1 spray daily or as directed by your healthcare provider.
NAD+ Energy, Brain, Vitality	NAD+ nasal spray is a formulation designed to enhance cellular energy, support brain health, and promote overall vitality. Its nasal delivery provides a quick and efficient way to boost NAD+ levels for improved physical and mental performance.	Boosts cellular energy production and mitochondrial function Enhances brain health and cognitive performance Supports anti-aging and longevity efforts Promotes mental clarity and focus Encourages improved physical endurance and recovery Reduces oxidative stress and supports cellular repair Offers a convenient and effective nasal delivery system	1 spray daily or as directed by your healthcare provider.
OXYTOCIN Connection, Calm, Trust	Oxytocin nasal spray is a formulation designed to enhance emotional bonding, reduce stress, and promote social connection. Its nasal delivery offers a convenient way to support mental and emotional well-being.	Enhances emotional bonding and intimacy Promotes trust and social connection Reduces stress and encourages relaxation Supports mood improvement and emotional resilience Aids in building stronger interpersonal relationships Provides a sense of calm and well-being Offers a convenient and effective nasal delivery method.	1 spray daily or as directed by your healthcare provider.
SELANK Calm, Focus, Balance	Selank nasal spray is a peptide formulation designed to reduce anxiety, enhance focus, and promote emotional balance. Its nasal delivery offers a quick and convenient method for supporting mental clarity and well-being.	Reduces anxiety and stress levels Enhances mental clarity and concentration Promotes emotional stability and resilience Encourages improved focus during demanding tasks Supports overall mood and mental well-being Aids in managing stress-related cognitive fatigue Offers a convenient and effective nasal delivery	1 spray daily or as directed by your healthcare provider.

			Offers a convenient and effective nasal delivery system	
	SELANK w/SEMAX Energy, Brain, Vitality	The Selank/Semax combined nasal spray offers a powerful blend designed to reduce anxiety, enhance cognitive performance, and promote emotional resilience. Its convenient nasal delivery provides quick and effective support for mental clarity and focus.	Reduces anxiety and stress for improved mental calmness Enhances cognitive function and memory retention Promotes emotional stability and stress resilience Encourages focus and sustained concentration Supports overall mood and well-being Aids in managing mental fatigue during demanding tasks	1 spray daily or as directed by your healthcare provider.
	THYMOSIN ALPHA Immunity, Resilience, Recovery	Thymosin Alpha-1 nasal spray is known for its ability to enhance immune function, promote recovery, and support overall resilience. Delivered nasally, it offers a convenient way to boost the body's natural defenses and well-being.	Strengthens the body's natural immune response Supports recovery from infections and illnesses Promotes resilience to stress and environmental factors Encourages a balanced inflammatory response Enhances energy levels and overall vitality Provides convenient and effective delivery via nasal spray Supports long-term health and immune system balance	1 spray daily or as directed by your healthcare provider.
